

# LED PEA LIGHT STRINGS

For applications down to ground level, you must use 24V for public safety.  
 For applications above 2.5m from ground level  
 it is safe to use 230V strings, but you can also use 24V.

**230V string** : 10m long/100 LED. 10 watts per string.  
 Separate mains lead with rectifier. Extendable to a maximum of 16 strings.  
 Glued heat shrink supplied to seal all joints.  
 Some twinkling versions now available.

Please specify cable colour when placing an order

For complex installations you can use the 5-way spider connector on opposite page.
