

LED PEA LIGHT STRINGS

For applications down to ground level, you must use 24V for public safety.
 For applications above 2.5m from ground level
 it is safe to use 230V strings, but you can also use 24V.

24V string : 5m long/50 LEDs. 5 watts per string.

Must use 230/24V transformer. Select from those on P14.

Separate supply lead with rectifier. Extendable to a maximum of 8 strings.

Some twinkling versions now available.

Please specify cable colour when placing an order

LED Colour	Pt no.
White	TDL050
Warm White	TDL051
Red	TDL052
Yellow	TDL053
Green	TDL054
Blue	TDL055
Multi Coloured	TDL05MDG
1.5m supply Lead	L0001
Spider Connector	TDL005

For complex installations you can use the
 5-way spider connector opposite.
 Please contact the office for assistance.

1 input - 5 output, for 24V or 230V
